smarter
IN THE CLOUD

*Imagine having secure and quick access to your files and applications from any device or location in real time. This is what the IT Workspace of the future looks like with **Radius Cloud**.*

Accelerate your business with a flexible digital IT Workspace that delivers:

- ✓ Remote access – work from anywhere
- ✓ Increased productivity – more efficient operations and work from multiple devices
- ✓ Business continuity – hourly backups of your systems.
- ✓ Gold standard IT security – firewalls, anti-virus and VPNs included as standard
- ✓ Streamlined IT – All of your IT resources managed in one location
- ✓ Reduce IT spend – No CapEx required for server hardware
- ✓ 24/7 IT helpdesk – fast response times

Radius Cloud is a private cloud infrastructure IaaS (Infrastructure as a Service) which allows your business to be agile. This gives your employees access to remote resources in the cloud (network, apps, folders, files and data) just as though they were sitting at their office desk.

Radius Cloud is designed with SMEs in mind and is a perfect solution for companies looking to simplify their digital transformation roadmap. This applies to all industries and companies ranging from five up to five hundred employees. Radius manage your data in our Irish-based data centre and protect it through multiple layers of IT security.

Radius Cloud eliminates the need for on-site server maintenance, updates and patches while keeping your systems fully secure and up to date. By utilising our highly skilled and Microsoft accredited engineers, it ensures total peace of mind for our clients, so you can focus on everything else.

Radius Cloud

A digital workspace that's tailored to your business without the worry of updates, maintenance and security:

- ✓ Works with all business-critical apps. E.g. SAP, Sage, Salesforce, Office 365, Adobe PDF Viewer etc.
- ✓ User profile management
- ✓ All connections encrypted using VPNs
- ✓ Reliable – fast performing, secure and consistent, unlike other alternative solutions
- ✓ Minimise Downtime - even in the event of a disaster, employees can securely access their data and apps from any internet enabled device or location
- ✓ Virtual Desktops via Thin Clients – Save extra using Thin Clients – removes the need for expensive laptops and PCs
- ✓ Only pay per user per month - scale up and down as your business dictates

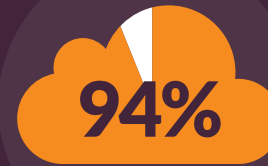

Said that the ability to quickly meet business demands was one of the most important reasons a business should move to a cloud environment.
Information Week

of organisations experienced business acceleration as a result of cloud adoption.
McAfee

Required fewer internal IT resources after switching to the cloud
PCWorld.com

Saw an improvement in IT security after switching to the cloud.
SalesForce

Said that the move to the cloud makes it easier to meet government compliance requirements.
SalesForce

Radius Cloud empowers companies to become more diverse as their business adapts. There are big advantages to workplaces that are more agile. Working from home or on the go becomes easier and safer. Managers can hire the best worker regardless of where they live and it also provides companies with **business continuity** in times of a crisis.

“ I can safely say it has changed the way we work for the better. The Cloud enables me to log on to my desktop from anywhere”.

David Kelly, Director,
Southern Regional Assembly.

About Us

Established in 1996, Radius Technologies is trusted by hundreds of progressive Irish SMEs to deliver world-class Cloud, IT and Telecoms solutions and services.

We offer both onsite and remote support from our offices in Dublin, Cork, and Waterford (HQ). Our service support systems are accredited to ISO: 9001 and ISO:27001 (information security) certification. We are proud to be a Microsoft Gold Partner, Cisco Premier Partner, HP Preferred Partner, and a Panasonic Business Solutions supplier.

Our IT engineers are certified by Microsoft and hold a wide variety of other leading industry certifications, such as Citrix, CISCO, Sonicwall and Hyper V. The team is continuously up-skilling to meet our customers' changing requirements. Our engineers and support technicians are available 24 hours a day, 365 days a year, allowing us to provide the highest level of support and customer care.
