

# Upgrade Your WFH Office Set-up for 2021

**Cloud** IaaS and a virtual desktop environment, give your people full access to apps & resources, robust security and frequent data backup

Upgrade your **broadband** connection, your primary router and/or install a mesh Wi-Fi system to deliver whole-home coverage

**Screen** size is important if you want to work comfortably with multiple browser tabs, documents and spreadsheets. Add a second screen for increased visibility

Cloud-hosted **phone** system with desktop and smartphone apps to ensure remote connectivity. Make/take calls just the same as if you were in the office

Invest in a **desk** and **chair**. Comfort and adjustability are important here, especially as remote working can involve long hours at the desk

For advice on remote working and cloud visit [radius.ie](https://radius.ie) or call 0818592500
